

PECOHNPLSBF

A-Eco semi-flexible illuminated bollard with solar leds on the upper part that activates automatically when it gets dark, white led perimeter light. Possibility of fixed or flashing light depending on the model to choose. Semi-flexible bollard ideal for places that do not require embedment with a 160x160 mm bottom plate. In the event of an impact and not defeating its flexibility, the bollard returns to its original position without any deformation. If these degrees are overcome, the bollard returns to its position with possible deformation in its appearance, they do not break like conventional plastic, iron or cast iron, thus making them a very economical and durable solution. Fixing by means of 4 metal plugs (not included)

STANDARD FINISHES:

Black + steady light..... **PECHNPLSBF**

Black + flashing light..... **PECHNPLSBI**

OPTIONAL:

- Double reflective strip.
- Other colors to consult.

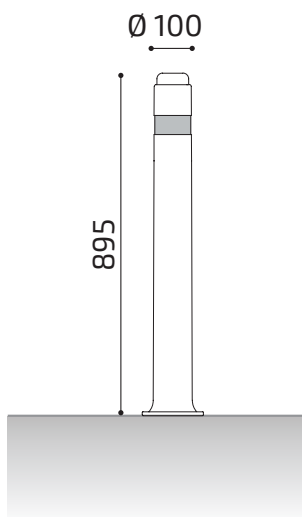

CHARACTERISTICS BOLLARDS A-ECO:

- 100% recyclable.
- They are not painted. They don't rust. They do not need maintenance.
- Limited flexibility.
- Great resistance to oils, greases and numerous solvents.
- Abrasion high resistance
- Nice touch.
- Aesthetically identical to the metal bollards.
- Reflective tape Level 2, improving the visibility of the pylon.

MEASURES:

Diameter: Ø 100 mm.

Height: 895 mm.
