

Ref. PSEGRECO154

Ref. PSEGRECO150G

Security Eco security bollards are constructed with two bodies, an outer body made of stainless steel which hides an inner core of reinforced iron. Possibility of filling the inside with concrete, sand or gravel to further reinforce the bollard.

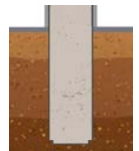

The Security security bollard is covered with a stainless steel or iron jacket (depending on the model).

Security bollards for luxury shops, in luxury shops, jewellery shops, commercial premises, banks, tobacconists,... which are perfectly integrated in prestigious environments and architects' projects,...

Fixing system of the bollard / bollard between the inner and outer tube by means of 3 stud bolts as a locking device.

OPTIONAL:

- AISI 316 stainless steel.
- Personalization with logo engraving.
- Possibility of filling its interior with concrete, sand, gravel to further strengthen the bollard.

Concrete interior option.
