

# WOOD FENCE YOSEMITE

**Yosemite model rural fence** made of wood and simple plasticised torsion wire mesh, maintaining a natural aesthetic and guaranteeing reliable protection for your spaces.

Rural fencing built with Ø95 mm posts and Ø80 mm boards made of autoclaved pine wood, guarantees durability and resistance to inclement weather.

Ideal for rural areas, gardens and agricultural properties, our fencing combines natural materials with protective treatments.

## MATERIALS:

- Class 4 autoclave pine wood.
- Autoclave treatment using a BETHELL system (vacuum pressure) based on water-soluble salts free of chromium and arsenic.
- Simple torsion mesh, galvanised + plasticised. Mesh with great endurance, high resistance. Its design allows the fencing to be adapted to all types of terrain without having to carry out special fabrications.

## APPLICATIONS:

Housing and residential areas

Urbanizations

Institutes and Schools

Parks and gardens

Hunting grounds

Farms and lands
